PROFESSIONAL SUMMARY

Computer Science student at Arab Open University, expected to graduate in 2027, focused on Machine Learning and Artificial Intelligence. Building practical skills in Python, data analysis, preprocessing, EDA, visualization, and foundational ML, with hands-on project experience and training through Creativa and DEPI.

EDUCATION

Arab Open University (AOU) — Bachelor's Degree in Computers and Information | 2023–2027 | Expected Graduation: 2027

- Relevant areas: Artificial Intelligence, Machine Learning, Python Programming, Data Analysis, Data Structures and Algorithms, Database Systems.

TECHNICAL SKILLS

- Programming: Python, Java
- Data Analysis & Processing: NumPy, Pandas, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Missing Values Treatment, Outlier Detection, Data Transformation, Normalization, Encoding
- Data Visualization: Matplotlib, Seaborn
- Machine Learning: Supervised Learning Fundamentals, Unsupervised Learning Fundamentals, Data Preparation, Model Evaluation Concepts
- Tools: GitHub, Google Colab, Visual Studio, IntelliJ IDEA

PROJECTS

Student Performance Predictor — Machine Learning Project | GitHub

- Built a model to predict students' exam scores and analyze daily habits using a dataset of 1,000 students and 16 features.
- Applied missing-value handling, label encoding, and StandardScaler preprocessing, then created features such as study efficiency score, sleep category, and leisure-to-study ratio.
- Used Random Forest Regression for score prediction and K-Means Clustering for student grouping; deployed the project as a Streamlit application.

Repository: https://github.com/bassionyahmed704-hash/Student-Performance-Predictor

Python Programming Projects

- Developed practical Python applications including task management and grade calculation programs using variables, conditions, loops, functions, lists, and basic data structures.

Data Analysis & EDA Projects

- Used Python and Pandas to inspect datasets, clean data, identify missing values, duplicates and potential outliers, and create visualizations with Matplotlib and Seaborn.

TRAINING & PROFESSIONAL DEVELOPMENT

- Creativa — practical technical training
- DEPI — Digital Egypt Pioneers Initiative
- Current learning: Machine Learning, Artificial Intelligence, Advanced Python for Data Science, Data Analysis, Statistics for Machine Learning, ML Algorithms and Model Evaluation
